

Black River Road Short and Long Term Recommendations

Recommended Short Term Improvements

- Construct Tech College / Shopping Center Road with Black River Road under two-way stop control with left turn lanes on the new road and on Black River Road
- Install a traffic signal when warranted at the intersection of Black River Rd with US 521 with a near side signal head on the Black River Road approach.
- Remove weave between I-20 WB Off Ramp and Century by bringing Off-Ramp right-turn to the intersection under stop control.
- Install a traffic signal when warranted at the intersection of US 521 at I-20 EB Ramps
- Convert the intersections of Century and Wall streets to only allow left turns from US 521 and right turns from the side streets

Recommended Long Term Improvements

- Install a traffic signal when warranted at the intersection of Black River Road with Tech College / Shopping Center Road
- Convert Black River Road to a 4-lane divided section between US 521 to Steeplechase Industrial Blvd
- Install a traffic signal when warranted at the intersection of Black River Road at Steeplechase Industrial Blvd
- Realign Black River Road with US 521 to a 90 degree angle and install additional turn lanes
- Install signals at both Century and Wall Street when warranted to assist with U-turns
